SUMMARY

Product designer with 4+ years taking digital products from research to shipped across AI-powered SaaS, fintech, and e-commerce. I own the full arc 0→1 concepts, user flows, prototypes, and scalable design systems and back design decisions with usability data. Architecture background brings strong spatial and systems thinking.

WORK EXPERIENCE

Product Designer — Bigly Sales (Remote) Jul 2025 – Present

- Own end-to-end design of an AI-powered SaaS platform for call-center operations and outbound sales spanning CRM, communication, scheduling, reporting, and workflow modules.
- Designed AI-assisted workflows that folded automation into existing call-center operations, stripping repetitive manual steps and letting agents run outreach, scheduling, and follow ups from a single view.
- Delivered user flows, wireframes, and production ready designs on a scalable design system, speeding design to engineering handoff.

UI/UX Designer — Arcitech, Mumbai Nov 2024 – Jul 2025

- Designed a comprehensive finance dashboard for Braenstone covering Payables, Receivables, Invoices, Alert Center, Customers, and Vendors turning complex financial workflows into a single, usable interface.
- Ran usability tests across the dashboard's core modules and shipped iterative fixes that made high-frequency tasks invoice lookup, payment status, vendor management quicker to complete and harder to get wrong.
- Partnered closely with stakeholders to keep design aligned to business goals and delivery timelines.

UX Designer — Bag2Bag, Bangalore Dec 2021 – Apr 2024

- Led UX research, wireframing, and prototyping for an e-commerce platform across web, iOS, and Android.
- Cut bounce rate 15% through improved interaction design, and restructured the information architecture to lift usability by 30%.
- Produced product design specifications that gave the development team clear, buildable guidance.

Freelance Product Designer (Remote) Aug 2021 – Nov 2021

- Designed e commerce products that improved user acquisition by 14 - 20%, collaborating across cross functional teams to deliver on schedule.

SKILLS

Design & Tools: Figma, Framer, Spline, Adobe Creative Suite (Illustrator, Photoshop, After Effects), Jira, ClickUp, Notion

Craft: End-to-end product design, UX/UI, design systems, wireframing, prototyping, user research, usability testing, interaction design, information architecture, motion & visual design

Domains: AI-powered SaaS, fintech dashboards, e-commerce (web + mobile)

EDUCATION

Bachelor of Design in Architecture — College of Engineering and Technology, Bhubaneswar May 2015 – Jun 2020

CERTIFICATIONS & TRAINING
